DX HUB
REMOTE AUDIO NETWORK EXPANDER

The DX Hub is a remote audio networking expander for the dLive and SQ series.

DX Hub provides 4 DX Link ports, each carrying 32×32 channels of 96kHz audio, that can be used to connect to remote DX expander units through a single gigaACE link.

The DX Hub can be connected to an SQ Slink port, or to a gigaACE option card in a dLive system.

Up to 2 DX Hub expanders can be connected to a gigaACE option card to create 4 redundant DX Links.

DX Hub is compatible with the dLive and SQ series.

Key Features

- Up to 100m CAT5e link
- 4 Independent DX ports
- Self-locking Ethercon connectors
- Ethernet L2 compatible
- Redundant or single link

Benefits

- Half space or 2 in 1U mount kit
- Up to 32x32 I/O per port
- Connections can be used thru a VLAN
- Supports DX auto firmware matching
- Plug 'n play (no network routing)
