1. General Information

Thank you for your purchase of a Marshall Miniature or Compact Camera.

The Marshall Camera team recommends thoroughly reading this guide for a deep understanding of on-screen-display (OSD) menus, breakout cable operation, settings adjustment explanation, troubleshooting, and other critical information.

Please carefully remove all contents of box, which should include the following components:

CV420-18X includes:

- Camera Breakout Cable (Power/RS485/Audio) •
- **IR Remote Controller** ٠
- 12V Power Supply •

The CV420-18X Camera utilizes a built-in 18x optical zoom lens.

Each camera comes set to default at 1920x1080p @ 30fps out of the box; which can be changed in the OSD Menu to a variety of resolutions and framerates.

If the camera is accidentally changed to a resolution or framerate that your monitor or equipment doesn't accept, please follow the instructions below to reset camera to factory default:

- panel (locking connection), Power LED should illuminate.
- seconds.
- 3. Camera should reset to 1920x1080p @ 30fps.
- 4. If camera does not reset, repeat steps after a power-cycle.

1. Plug the camera into power source and connect breakout cable to rear camera

2. Push OSD joystick button UP, DOWN, UP, DOWN and PUSH and HOLD for five

- AUTO: Adjusts the exposure level automatically. Detailed fine tuning options are available • under this menu.
- **SHUT PRI:** Provides more detailed shutter speed options. All other controls are tuned for the selected shutter speed.
- IRIS PRI: Provides more detailed iris control options. All other controls are tuned for the selected iris.
- AGC PRI: Provides more detailed gain option. All other controls are tuned for the selected gain.
- BRIGHT: Provides bright exposure level control.
- **MANUAL:** Adjusts the exposure level manually
 - 1. SHUTTER: Speed can be set at auto or manual. (NTSC: 1/60~1/10,000, PAL: 1/50~10,000)
 - 2. IRIS: Electronic Iris speed can be controlled. (F1.6~F16)
 - **3.** AGC: Electronic gain level can be controlled. (0dB~27dB)
 - 4. AGC MAX: Used to set maximum gain value to control the video noise caused by Auto Gain Control. (0~15)
 - 5. SENS UP: Controls the digital slow shutter to allow extra light into the camera and adjust the picture quality. (off, $x2 \sim x15$)
 - 6. AE BRIGHT: Select this to adjust auto exposure brightness levels. (0~24)
 - 7. FLICKERLESS: Provides a proper image sensor frequency to match the power frequency in order to minimize video flicker.

6. FOCUS CONTROL _

Select FOCUS CONTROLI using the UP or DOWN button. You can change between AUTO and Manual focus modes.

Warranty _

Marshall Electronics warranties to the first consumer that this device will, under normal use, be free from defects in workmanship and materials, when received in its original container, for a period of two years from the purchase date. This warranty is extended to the first consumer only, and proof of purchase is necessary to honor the warranty. If there is no proof of purchase provided with a warranty claim, Marshall Electronics reserves the right not to honor the warranty set forth above. Therefore, labor and parts may be charged to the consumer. This warranty does not apply to the product exterior or cosmetics. Misuse, abnormal handling, alterations or modifications in design or construction void this warranty. No sales personnel of the seller or any other person is authorized to make any warranties other than those described above, or to extend the duration of any warranties on behalf of Marshall Electronics, beyond the time period described above.

Due to constant effort to improve products and product features, specifications may change without notice.
