

Introducing A Whole New Way To Think About Architectural Preset Stations...

SceneStation sets a new standard for full-featured, easy to use, cost-effective DMX lighting control. SceneStation is entirely self-contained in a single gang wall switch sized unit. Perfect for restaurants, high-end residential, trade show booths, churches and more, SceneStation can control nearly any DMX device (RGB fixtures, moving lights, dimmers, effects, etc.), while also remaining very simple for the end user.

SceneStation is dynamic. Instead of only offering the ability to play back a few simple "presets", SceneStation can be programmed to run shows with multiple steps, loops and beautiful built-in effects.

The secret is the power and flexibility of the built-in effects engine and fully-customizable preset buttons. SceneStation goes way beyond simple "presets" with the ability for each scene to have stunning effects such as Twinkle, Sparkle, various color animations and more. SceneStation's buttons can be programmed with advanced features like running chases, stepping sequentially through a list of scenes, toggle, momentary and pile-on functions and more. Additionally, each button includes fully-programmable RGB backlighting and the button caps can be optionally engraved with custom legends.

Another important feature of SceneStation is how easy it is to program. The powerful SceneStation Studio software (available for Mac or Windows) is a simple, but powerful graphical environment for setting up and building content for SceneStation.

- Completely Self-Contained
- SceneStation Studio software for Station Management, Programming and Operation
- Built-in Effects Engine for creating beautiful, dynamic scenes ★
- 64 Scene Capacity
- Static, Sequential, Toggle, Chase, Momentary and Pile-On Modes for each button
- Programmable RGB Backlit Buttons
- Optional IR Remote for recalling presets or adjusting overall brightness ★
- Multiple Master/Slave Stations via 2.4GHz Wireless Network
- DMX-512 Output with 44Hz Update Rate for silky-smooth fades and effects ★
- Update DMX Snapshots Directly from Front-Panel ★
- Automatic "Power-On" Preset Activation
- Automatic Console Backup
- 12-24V AC or DC Operation
- Decora® Wall Station Compatible
- Optional Button Engraving
- Available in White, Black, Ivory or Light Almond

★ New in version 3.0
