### H7 Headset Snap-On Cables

Unlike headsets that are hard-wired from the mic to the connector, our cables quickly and securely snap into the H7 Headset to link the mic to the wireless system.

## H6 Omni Headset

The H6 Omni Headset is the lowest profile headset microphone in the world. Combining the transparent sound quality and water-resistant capsule design of the E6 Earset with a comfortable, lightweight, and easily adjustable headframe, the H6 Omni Headset is perfect for houses of worship, theaters, broadcasters, and presenters.

## H6 Directional Headset

The H6D Directional Headset is the lowest profile uni-directional headset microphone in the world. Combining the exceptional isolation and natural sound quality of the E6D capsule on a lightweight, comfortable, and secure headframe design, the H6D is an ideal choice for acoustically challenging situations.

example: H6D W5 T SL

## H6 Headset Snap-On Cables

Unlike headsets that are hard-wired from the mic to the connector, our cables quickly and securely snap into the H6 Headset to link the mic to the wireless system. Cables are compatible with omni and directional models.

example: H6CABLE L SL

**1 Color:**

L = Light Beige    C = Cocoa  
T = Tan              B = Black

**2 Cable Code:**

Use the table below to find the right code for your transmitter.

### H6 Headset Headframe

The H6 Headset Headframe provides a secure and comfortable fit on the head, and can be purchased separately from the H6 Mic Boom and H6 Cable. The headframe is compatible with both omni and directional H6 models.

example: H6FRAME L

**1 Color:**

- L = Light Beige
- T = Tan
- C = Cocoa
- B = Black

H6 Headset Frame	<b>Price</b> 165.00
------------------	------------------------

### H6 Omni Headset Mic Boom

The H6 Omni Headset Mic Boom can be purchased separately from the H6 Head-frame and the H6 Cable. It includes the omni mic element on the stainless steel boom, terminated with the H6 Snap-On connector. Select the mic sensitivity and color based on your applications' needs.

example: H6OBOOM W5 L

**1 Sensitivity:**

- W5 = For general speaking
- W6 = For speaking and vocals
- W7 = For strong vocals

**2 Color:**

- L = Light Beige
- T = Tan
- C = Cocoa
- B = Black

H6 Headset Microphone Boom	<b>Price</b> 498.00
----------------------------	------------------------

### H6 Directional Headset Mic Boom

The H6 Directional Headset Mic Boom can be purchased separately from the H6 Head-frame and the H6 Cable. It includes a directional mic element on the stainless steel boom, terminated with the H6 Snap-On connector. Select the mic sensitivity and color based on your applications' needs.

example: H6DBOOM W5 L

**1 Sensitivity:**

- W5 = For general speaking
- W6 = For speaking and vocals
- W7 = For strong vocals

**2 Color:**

- L = Light Beige
- T = Tan
- C = Cocoa
- B = Black

H6 Headset Microphone Boom	<b>Price</b> 545.00
----------------------------	------------------------

## Selecting the Right E6 Earset

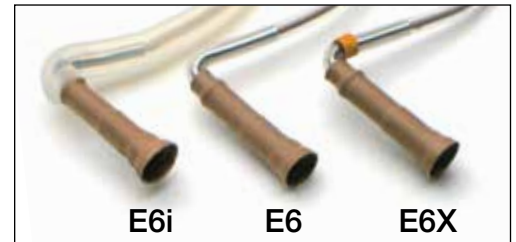

The E6 Earset is an unobtrusive, world-class mic that delivers high-quality voice pickup while rejecting surrounding noise and feedback. The E6 is adaptable to a wide range of applications, and we offer many customization options to best meet your specific needs. We've listed the options below, with some tips on how to choose the best E6 for you. Let's start with an example E6 part number, which represents a **1** soft boom, **2** omnidirectional, **3** for general speaking, **4** tan colored E6 with a **5** 2mm diameter cable configured for a **6** Shure wireless bodypack.

E6i O W5 T 2 SL

**1**      **2**      **3**      **4**      **5**      **6**

### **1 Flexibility: Springy, Soft, or Half-and-Half**

If the mic will only be used by one person, choose the classic **E6**, which has a springy boom—once adjusted for fit, it will continually hold this shape. If many different speakers will be using the same mic, get the **E6i** with a soft, durable boom designed to be flexed repeatedly. The third option, the **E6X**, has a springy ear-loop and a soft boom, and is great when a few people will be using one mic.

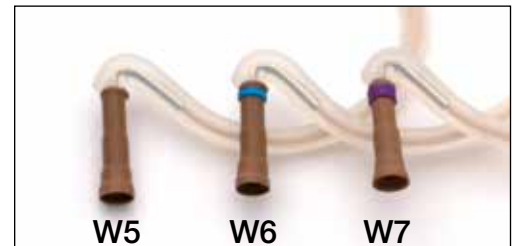

### **2 Polar Response: Omni or Directional**

An omnidirectional (**O**) Earset rejects unwanted sound and feedback better than a lavalier almost any way you wear it, so it is very user-friendly for new and experienced users alike. It's ideal for anyone working with a PA system covering a room without stage monitors. For situations where there are loud monitors, extreme feedback, or environmental noise, choose a directional (**D**) Earset.

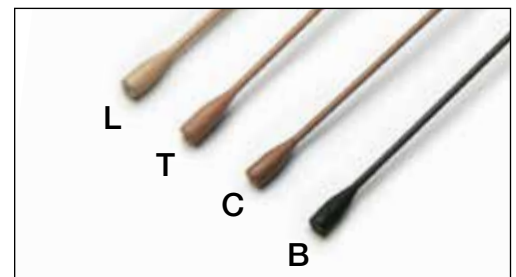

### **3 Sensitivity: W5, W6, or W7**

The more sensitive a microphone is to soft sounds, the earlier it will overload at loud sounds. The W5, W6, and W7 sensitivity designators correspond to general speaking, loud speaking and vocals, and powerful vocals, respectively. For standard spoken word applications, choose the **W5**. For musical theater, or dynamic presenters, choose the **W6**. For opera singers, or other extremely loud applications only, choose the **W7**.

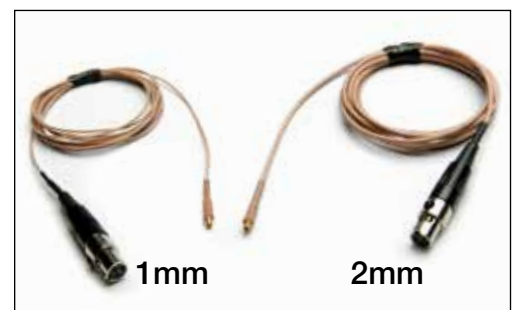

### **4 Color: Tan, Light Beige, Cocoa, or Black**

Tan (**T**) is the most popular choice, because it works perfectly well for average Caucasian skin tones, as well as olive complexions. Light beige (**L**) works well in theatrical applications due to its slightly pink undertone, and is also appropriate for extremely fair skin. Cocoa (**C**) is the ideal choice for African American skin tones ranging from very light to chocolate, and black (**B**) is appropriate for extremely dark skin, or for situations where you want the mic to be visible. When in doubt, choose the darker options, as it will be more likely to blend in and draw less attention.

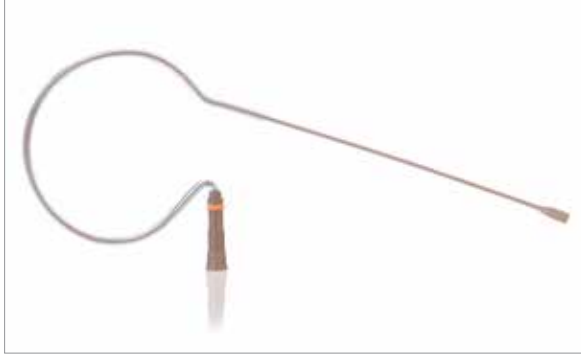

### **5 Cable Diameter: 1mm or 2mm**

E6 Cables are available in two diameters: 1mm (**1**) for minimum visibility, and 2mm (**2**) for maximum durability. The 1mm cable can barely be seen when worn. The 2mm cable is slightly more visible, but provides more than 50 lbs of tensile strength.

### **6 Wireless Compatibility: Hundreds of Options**

E6 Earsets are compatible with almost every wireless transmitter bodypack, digital audio recorder, or phantom powered XLR input. For a full list of compatible options, please visit our website ([www.countryman.com/support/wireless](http://www.countryman.com/support/wireless)).

Supplied with cable, carrying case, black and white cable clips, wind screen, and protective caps.

### E6 Flex Omni Earset

The E6 Flex Omnidirectional Earset combines the best of the classic E6 Omni Earset with the best of the omni E6i. The slim, springy ear section grips securely like a classic E6, while the flexible front boom takes abuse like the E6i and allows precise placement and easy reshaping. It weighs less than one-tenth ounce, virtually disappears against the skin, and custom fits so performers forget they're even wearing a mic.

example: E6XO W 5 T 1 SL  
① ② ③ ④ ⑤

**① XLR or wireless:**

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

**② Sensitivity:**

5 = For general speaking  
6 = For speaking and vocals  
7 = For strong vocals

**③ Color:**

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**④ Cable Diameter:**

1 = 1mm cable  
2 = 2mm cable

**⑤ Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

### Accessories (when purchased separately)

E6 Cable Clip	16.95
E6 Omnidirectional Protective Cap	11.25
E6 Windscreen	9.25
Earset EarClip	79.95

Supplied with cable, carrying case, black and white cable clips, wind screen, and protective caps.

## E6 Omni Earset

The E6 Earset is a world-class vocal mic so unobtrusive it's barely seen as it delivers high-quality voice pickup, while rejecting surrounding noise and feedback. An ultra-miniature electret condenser element is held close to the mouth by a thin boom and comfortable earclip. The omnidirectional element is nearly immune to wind and breath pops, even when used without a windscreen, while the boom keeps it very close to the mouth for excellent isolation.

example: E6O W 5 T 1 SL  
 1  2  3  4  5

### 1 XLR or wireless:

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

### 2 Sensitivity:

5 = For general speaking  
 6 = For speaking and vocals  
 7 = For strong vocals

### 3 Color:

L = Light Beige  
 T = Tan  
 C = Cocoa  
 B = Black

### 4 Cable Diameter:

1 = 1mm cable  
 2 = 2mm cable

### 5 Cable Connector:

Use the table on the next page to find the right code for your transmitter.

## E6 Flex Directional Earset

The E6 Flex Directional Earset combines the best of the classic E6 directional earset with the best of the directional E6i. The slim, springy ear section grips securely like an E6 classic, while the flexible front boom takes abuse like the E6i and allows precise placement and easy reshaping. The ultra-miniature directional element delivers exceptional sound quality and rejects surrounding noise or feedback from nearby stage monitors and speakers.

example: **E6XD** W 5 T 1 SL

Supplied with cable, carrying case, black and white cable clips, wind screen, and protective caps.

## E6 Directional Earset

The E6 Directional Earset mic provides high-quality voice pickup while rejecting surrounding noise, stage monitors, or feedback from nearby speakers. An ultra-miniature mic element is held close to the mouth by a thin boom and comfortable earclip for world-class vocal mic sound with far better isolation than an omnidirectional mic can provide. The entire assembly weighs less than one-tenth ounce and almost disappears against the skin, so performers can forget it's there and audiences barely see it.

example: **E6D** W 5 T 1 SL  
① ② ③ ④ ⑤

### ① XLR or wireless:

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

### E6i Directional Earset

The Countryman E6i Directional Earset provides high-quality voice pickup while rejecting surrounding noise, stage monitors, and feedback from nearby speakers. An ultra-miniature directional element is held close to the mouth by a thin boom and comfortable earpad. The flexible boom of the E6i holds up to repeated rebending by multiple performers.

## E6 Series Earset Snap-On Cables

Unlike earsets that are hard-wired from the mic to the connector, our cables quickly and securely snap into all E6 series earsets to link the mic to the wireless system.

example: E6CABLE L 1 SL  
① ② ③

**① Color:**

L = Light Beige C = Cocoa  
T = Tan B = Black

**② Cable Diameter:**

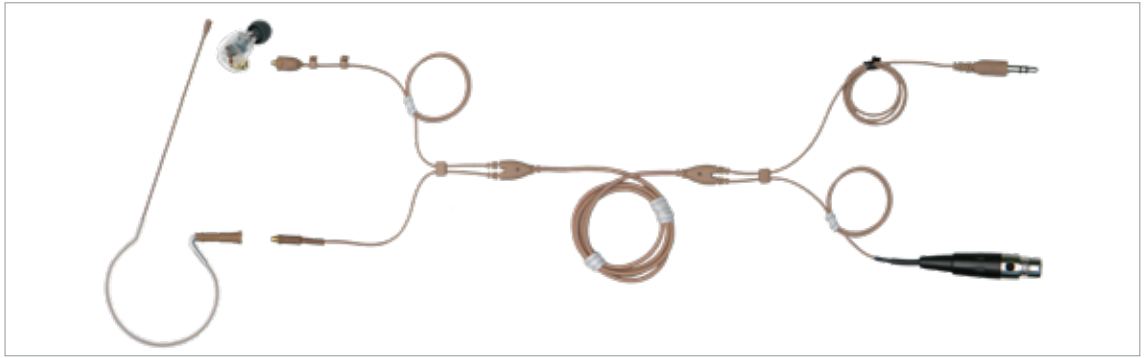

1 = 1mm cable  
2 = 2mm cable

**③ Cable Code:**

Use the table below to find the right code for your transmitter.

Find your ① transmitter brand and ② transmitter model to identify the connector, code, and pricing (USD).

① Brand	② Transmitter Model	Connector	Code	Price

### EM6 Earset Cable — Single Earphone Integration

The EM6 Earset Cable enables low-profile and comfortable integration of the Countryman E6 Earsets and Shure Sound Isolating™ Earphones. On one end, the cable interfaces to any E6 Earset and any detachable Shure Sound Isolating™ Earphone; on the other end, to a wireless transmitter bodypack and a wireless receiver bodypack. Both the earset and earphone are fully detachable, facilitating easy and rapid on-site replacement and multiple-user sharing of the device.

example: **EM6 T 1 SL** (cable only: EM6 Earset cable, tan, single earphone version, Shure TA4F wiring)

1 2 3

**1 Color:**

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**2 Single/Dual:**

1 = Single-Ear\*  
\* Note: Dual-ear version will be available soon.

**3 Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

package example: **EM6 I O W 5 T 1 SL 4 L** (E6IO earset tan W5 with left ear SE425 earphone and EM cable)

1 2 3 4 5 6 7 8 9

**1 Flexibility:**

Blank = Springy  
I = Soft  
X = Springy ear, soft boom

**2 Pattern:**

O = Omni  
D = Directional

**3 Wired or Wireless:**

W = Wireless  
P = XLR (Hardwired)

**4 Sensitivity:**

5 = Speaking  
6 = Vocals  
7 = Strong Vocals

**5 Color:**

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**6 # Earphones:**

1 = Single

**7 Connector:**

The table on the next page lists the code for your transmitter.

**8 Earbud:**

4 = SE425  
5 = SE535

**9 Left / Right Ear:**

L = Left  
R = Right

### Related Items (purchased separately):

#### E6 Earset Microphones:

Any E6 Earset (sold separately) can be used with the EM6 Earset Cable: E6O, E6D, E6iO, E6iD, E6XO, E6XD, E6S.

#### Shure Earphone:

**SE 425 L**

1 2

**1 Earphone Model:**

425 = Dual Driver  
535 = Triple Driver

**2 Side:**

L = Left Ear  
R = Right Ear

Find your **1** transmitter brand and **2** transmitter model to identify the connector, code, and pricing (USD).

## E2 Earset

The E2 Earset redefines pure sound in a virtually invisible package, and is easier to use than even a lavalier or podium microphone. Like the classic E6 Earset, the E2 rests over the ear, but has a much shorter boom, with a uni-directional element that provides nearly the isolation of an E6 Omni at the mouth, but with significantly less visibility. With an equalizing circuit built into the audio connector, the frequency response is tuned so you can experience full-bodied bass and precise highs that are indiscernible from an omni mic at the mouth.

example: **E2** W 5 I SL  
                  ① ② ③ ④

### ① XLR or wireless:

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

### ② Sensitivity:

5 = For general speaking and vocals

6 = For strong vocals

### ③ Color:

L = Light Beige  
T = Tan

C = Cocoa  
B = Black

### ④ Cable Connector:

Use the table on the next page to find the right code for your transmitter.

### EM2 Earset Cable — Single Earphone Integration

The EM2 Earset Cable enables low-profile and comfortable integration of the Countryman E2 Earset and Shure Sound Isolating™ Earphones. On one end, the cable interfaces to the E2 Earset and any detachable Shure Sound Isolating™ Earphone; on the other end, to a wireless transmitter bodypack and a wireless receiver bodypack. Both the earset and earphone are fully detachable, facilitating easy and rapid on-site replacement and multiple-user sharing of the device.

example: **EM2 T 1 SL** (cable only: EM2 Earset cable, tan, single earphone version, Shure TA4F wiring)

1 2 3

**1 Color:**

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**2 Single/Dual:**

1 = Single-Ear\*  
\* Note: Dual-ear version will be available soon.

**3 Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

package example: **EM2 W 5 T 1 SL 4 L** (E2 earset tan W5 with left ear SE425 earphone and EM cable)

1 2 3 4 5 6 7

**1 Wired or Wireless:**

W = Wireless  
P = XLR (Hardwired)

**2 Sensitivity:**

5 = Speaking  
6 = Vocals  
7 = Strong Vocals

**3 Color:**

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**4 # Earphones:**

1 = Single

**5 Connector :**

The table on the next page lists the code for your transmitter.

**6 Earbud:**

4 = SE425  
5 = SE535

**7 Left / Right Ear:**

L = Left  
R = Right

### Shure Sound Isolating™ Earphones

Designed for the demanding specifications of live performance, Shure Sound Isolating™ Earphones provide an unparalleled combination of sound signatures, noise isolation and build quality in small and comfortable universal-fit designs. One earphone is provided with a complete fit kit and a protective case.

example: SE 425 L  
 ① ②

① Earphone Model: 425 = Dual Driver, 535 = Triple Driver  
 ② Side: L = Left Ear, R = Right Ear

	Price
Shure Sound Isolating Earphone - SE425	170.00
Shure Sound Isolating Earphone - SE535	275.00

### Earset EarClip

Comfortable, adjustable, extremely low-profile two-ear support for Countryman Earsets. Earset not included. Supplied with EarClip cable hooks.

example: EC L T  
 ① ②

① Mic Placement: L = Mic on left (most popular), R = Mic on right  
 ② Color: T = Tan, B = Black

	Price
Earset EarClip	79.95

### Accessories

EarClip Cable Hook example: ECHOOK T 1  
 ① ②

① Color: T = Tan, B = Black  
 ② Cable Diameter: 1 = 1mm cable, 2 = 2mm cable

	Price
EarClip Cable Hook	6.25

### A3 Podium Microphone

Each A3 Podium Microphone starts with precision-crafted capsules, exhaustively tested for perfect sonic performance. The unique dual-capsule design permits selectable patterns and enables Active Plus Vibration Cancellation to dramatically reduce thumps, wind and handling noise. The result is an uncompromising microphone for the most demanding environments.

example: A3 S 18  
1 2

**1 Directional Pattern:**

- C = Cardioid
- H = Hypercardioid (popular)
- O = Omnidirectional
- S = Selectable

**2 Overall Length:**

- 12 = 12 in
- 18 = 18 in (popular)
- 24 = 24 in

	Price
A3 Podium Microphone - Fixed Pattern	699.95
A3 Podium Microphone - Selectable Pattern	1149.00

### Accessories (when purchased separately)

### ISOMAX 4RF Podium

The ISOMAX 4RF's unique Active Vibration Isolation detects and subtracts table thumps, handling noise, and other vibration from the signal, providing full, clean sound without the need for bulky shock mounts. Its tightly-controlled, consistent pickup pattern preserves voice quality at any angle while reducing feedback. Supplied with windscreen.

example: M4 H P5RF 18 E  
1 2 3

**1 Directional Pattern:**

- H = Hypercardioid
- C = Cardioid

**2 Overall Length:**

- 12 = 12 in
- 18 = 18 in (popular)
- 24 = 24 in

**3 Flexibility:**

- E = Both ends (popular)
- T = Top flexible
- R = Rigid (hand bendable)
- B = Bottom flexible

	Price
ISOMAX 4RF Podium Microphone	475.00

Supplied with wireless adapter (if detachable), carrying case, cable clips, windscreen, and protective caps.

## B6 Lavalier

Only one tenth of an inch in diameter, the B6 is the smallest lavalier in the world and outperforms microphones many times its size. The changeable protective caps provide moisture resistance and color options and let you shape the frequency response to suit different applications or to match other microphones. With exceptionally low handling noise and rugged construction, the B6 is the ideal choice for theater, broadcast, churches, and general lavalier applications. Available with fixed or detachable connectors.

example: B6 W 4 FF05 B D SL  
① ②
③ ④ ⑤

### ① XLR or wireless:

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

### ② Sensitivity:

4 = Standard, for most uses

5 = Low, head miking for theater

6 = Very low, mic near user's mouth

### ③ Color:

W = White

L = Light Beige

T = Tan

C = Cocoa

B = Black

### ④ Detachability:

D = Detachable

(blank) = Fixed / non-detachable

### ⑤ Connector Code:

Use the table on the next page to find the right code for your transmitter.

### B6 Detachable Connectors

Connect the B6 Omnidirectional Lavalier to wireless transmitters and digital recorders.

example: B6CON SL  
**1**

**1 Connector Code:** Use the table above to find the right code for your transmitter.

Supplied with carrying case, black and white cable clips, windscreens and protective caps.

### B3 Lavalier

Our B3 is essential to any well-stocked pro audio toolkit: it captures the highest-quality audio available in a lavalier mic, with field-selectable HF response caps and extremely low handling noise. Whether you need a tie-clip lavalier for an interview, a hair-hidden mic for drama, a water-resistant mic for water sports or hurricane reporting, or simply a small mic to hide in a prop flower vase, you'll never run out of applications for Countryman's B3 lavalier.

example: **B3** W 5 **FF05** T SL

① ②

③ ④

#### ① XLR or wireless:

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

#### ② Sensitivity:

4 = Standard, for most uses  
5 = Low, head miking for theater

#### ③ Color:

L = Light Beige  
T = Tan  
C = Cocoa  
B = Black  
W = White

#### ④ Connector:

Use the table on the next page to find the right code for your transmitter.

### Accessories (when purchased separately)

#### B3 Windscreens:

## EMW Lavalier

A world-favorite lavalier, the EMW delivers excellent sound with minimal clothing noise, in a sleek, yet rugged, nearly waterproof design. That's why the EMW lavalier has long been regarded as one of the best, most affordable workhorse lavaliers on the market, which no audio kit should be without. From news anchors and talk show guests to underwater documentaries and feature films, our EMW is truly in use everywhere you've never noticed!

example: MEMW    F 05 L SL  
                  1   2           3   4

### 1 XLR or wireless:

Blank = The mic will connect to a wireless pack.

P4 = The mic will connect to an XLR input with phantom power.

EMW Double Tie Clip	24.75
EMW Magnetic Clip	19.50
EMW Single Tie Clip	16.95
EMW Viper Clip	16.95
EMW Windscreen	9.25

Supplied with wireless adapter (if detachable), carrying case, single isolation clip, windscreen, and protective cap.

### B2D Directional Lavalier

The B2D is easily the smallest directional lavalier in the world, with the next smallest mic being more than twice its size. Combined with exceptional sound quality and isolation, this tiny package opens up a new set of miking options that were previously unavailable. The tight hypercardioid pattern gives the B2D an extra 6-10 dB of headroom compared to an omni lav, meaning less problems with feedback, ambient noise, room rumble, and phase cancellations with multiple mics.

example: **B2D** W 4 **FF05** B SL F  
                  ① ②                   ③ ④ ⑤

**① XLR or wireless:**

W = The mic will connect to a wireless pack.

P = The mic will connect to an XLR input with phantom power.

**② Sensitivity:**

4 = Standard, for most uses  
5 = Low gain, head miking for theater

**③ Color:**

W = White  
L = Light Beige  
T = Tan  
C = Cocoa  
B = Black

**④ Connector Code:**

Use the table on the next page to find the right code for your transmitter.

**⑤ Detachability:**

(blank) = Detachable  
F = Fixed / non-detachable

### Accessories (when purchased separately)

B2D Windscreen:

**B2DWSR** T  
                  ①

**① Color:**

## ISOMAX Headset

One of the best-sounding headset mics of all time, our Isomax Headset Mic remains the favorite of countless high-profile performing artists. It's sleek, comfortable, and stays securely in place, even during dance-oriented performances. It zeroes in on its source, capturing warmth in a wide frequency range. It rejects unwanted sounds and monitor feedback even better than most handhelds. And it tolerates sweat, weather, and makeup better than any other headset. Best of all, it's affordable and durable, providing a long life of excellent sound.

example: MH H W3 HH05 B SL

ISOMAX Headset Standard Oval Windscreen	11.50

Supplied with windscreen, basic clip, and carrying case.

## I2 Instrument Microphone

The I2 Instrument Microphone is engineered from the ground up for smooth frequency response, low noise, and precise polar patterns with deep nulls and natural on- and off-axis response. The combination of small size and sonic precision makes it ideal for X-Y, M-S, and other techniques that rely on accurate coincident positioning and consistent patterns. Its tiny size avoids distractions on camera. Flexible new close miking techniques are aided by Countryman's line of clips and mounts, which are designed to mount securely and gently to many different instruments.

example: **I2** H S 05 SL  
          ① ② ③ ④

**① Directional Pattern:**

H = Hypercardioid  
C = Cardioid  
O = Omnidirectional  
B = Bidirectional / Figure-8

**② Sensitivity:**

S = Standard gain (close miking)  
H = High gain (distance miking)

**③ Cable Length:**

05 = 5 feet (wireless only)  
10 = 10 feet (hardwired only)

**④ Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

## I2 Saxophone and Brass Microphone Kit

The I2 Saxophone and Brass Microphone Kit has been engineered from the ground up for smooth frequency response, low noise, and precise polar patterns with deep nulls and natural on- and off-axis response. Its tiny size makes it perfect for distance miking that is invisible on camera. Flexible close miking techniques are aided by Countryman's Instrument Mount for saxophones, brass, and horns, featuring a flexible positioning arm for perfect microphone placement.

example: I2 H S 05 SL - SKIT  
① ② ③ ④

**① Directional Pattern:**

H = Hypercardioid  
C = Cardioid  
O = Omnidirectional

**② Sensitivity:**

S = Standard gain

**③ Cable Length:**

05 = 5 feet (wireless only)  
10 = 10 feet (hardwired only)

**④ Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

Kit includes windscreen, I2 microphone, mount, and case.

## I2 Guitar Microphone Kit

The I2 Guitar Microphone Kit has been engineered from the ground up for smooth frequency response, low noise, and precise polar patterns with deep nulls and natural on- and off-axis response. Countryman's Guitar Mount positions the microphone for excellent pickup on center hole instruments.

example: I2 H H 05 SL - GKIT  
① ② ③ ④

**① Directional Pattern:**

H = Hypercardioid  
C = Cardioid  
O = Omnidirectional

**② Sensitivity:**

H = High gain

**③ Cable Length:**

05 = 5 feet (wireless only)  
10 = 10 feet (hardwired only)

**④ Cable Connector:**

Use the table on the next page to find the right code for your transmitter.

## I2 Flute Microphone Kit

The I2 Flute Microphone Kit has been engineered from the ground up for smooth frequency response, low noise, and precise polar patterns with deep nulls and natural on- and off-axis response. Countryman's Flute Mount is extremely low-profile mount and brings the microphone close for excellent pickup and isolation.

example: I2 H H 05 SL - FKIT

### ISOMAX 2 All-Purpose Mic

The ISOMAX 2 is a Countryman classic, still delivering the industry's tightest pattern control for an all-purpose mic. Available in omni, cardioid, and hypercardioid patterns, the Isomax 2 offers true frequency-independent pattern control—unlike competing mics that become omnidirectional at the low frequencies. This precise response captures strings, wind, brass and percussion beautifully, with exceptional gain before feedback and excellent rejection of the rest of the band. What's more, they're so affordable, you'll find plenty of ways to use them!

example: **M2** H W3 **FF** 05 SL

①    ②                      ③    ④

**① Directional Pattern:**

H = Hypercardioid  
C = Cardioid  
O = Omnidirectional

**② Mic Code:**

Use the table on the next page to find the right code for your option.

**③ Cable Length:**

05 = 5 feet (wireless only)  
10 = 10 feet (hardwired only)

**④ Cable Connector:**

128.50

## COUNTRYMAN ASSOCIATES TYPE 10 DIRECT BOX

USER  
JUN 2018

### Type 10 Direct Box

The Type 10 DI box is the ideal counterpart to our classic Type 85, combining the exceptional ruggedness and versatility of the Type 85 with an advanced design that sets a new standard for pure performance. The Type 10 delivers your sound with the lowest distortion, lowest noise, and highest accuracy of any direct box. The result is a clean, precise sound that is completely faithful to the original.

part no.: DT10

Type 10 Direct Box

Price  
299.00

## COUNTRYMAN ASSOCIATES TYPE 85 DIRECT BOX

USER  
JUN 2018

### Type 85 Direct Box

The classic Type 85 connects any high-impedance instrument pickup, even piezo pickups, to a balanced microphone (XLR type) input. It provides a strong, clean signal to the mix board without adding noise or distortion. It won't change the tone or volume you hear from your own amp like passive direct boxes. It won't break just when you need it. It won't develop a dead battery on stage because it runs on Phantom power.

part no.: DT85

Type 85 Direct Box

Price  
238.65

## COUNTRYMAN ASSOCIATES TYPE 10S DIRECT BOX

USER  
JUN 2018

### Type 10S Direct Box

The Type 10S is a two-channel version of the Type 10 direct box. Each channel uses the same innovative circuitry as the Type 10—delivering industry-leading technical performance like the Type 10—with some new features that meet the unique needs of the stereo or two-channel user.

part no.: DT10S

Type 10S Direct Box

Price  
550.00

## COUNTRYMAN ASSOCIATES TYPE 85S DIRECT BOX
