

## 4K Made Affordable.

Based on our wildly successful Pure White and Gray screen options, Solar was introduced to offer very fine texture reproduction but at an affordable price.

## Go Big or Go Home.

Your Solar screen is cut on a computer driven, cable operated system that can product a seamless viewing surface in sizes up to 200in (5080mm) diagonally in 16:9. For super-wide applications, we can go even longer up to 3600in (91440mm) wide without a seam!

## Future Proof

Solar is an excellent front projection screen option for Residential and Commercial applications. It performs best when paired with bright projectors used in dim to moderately lit environments with lighting that is focused away from the screen, as this type of screen performs best in light-controlled environments.

Max Width	2952" (74980mm)	
Max Height	184" (4673mm)	
Min Height	103" (2616mm) in 16:9	
Gain	.85	1.3
ALR	15%	10%
Half Gain	80°	75°
Minimum Throw	0.2 x Image Width	
Projection Type	Front Only
